

# (A) density maintenance theory

$$\frac{S_A}{V} = \frac{\kappa \phi_{mem}}{2(1 + \beta \phi_{rib} - \phi_{mem} - \phi_{peri})}$$

cytoplasm-membrane density ratio  $\kappa \phi_{mem}$  membrane proteome allocation

surface-to-volume ratio  $\frac{S_A}{V}$  RNA-protein ratio  $\beta \phi_{rib}$  periplasmic proteome allocation  $\phi_{peri}$

uncertainty: 95%, 68%, median,  $\approx 1\sigma$ ,  $\approx 2\sigma$
